

KEEPING IT SIMPLE IS SMART

One thing we've learned over the years is that the more complicated things get, the more likely they are to fail – and the more expensive they are to repair. Our design and engineering process is to figure out how to simplify and make things more efficient, while still withstanding rigorous use. The simple and durable solution is the one that works best.

We have engineered Mobile Shredding Equipment that is simple to maintain – with fewer moving parts than competitive equipment. Our low-RPM, high-torque shredder assembly increases the life of all hydraulics, pumps, gearboxes and shredder shafts. High tip force and aggressive hook profile ensures superior throughput even on the toughest dense paper.

The result is a shred truck that requires low maintenance and is **ENGINEERED TO LAST**.

Our solid cutter shaft is renowned for being the most solid & reliable available in the industry.

PREMIUM COMES STANDARD

All of our models include critical standard features that ensure your operating experience is efficient, reliable and safe.

STANDARD FEATURES INCLUDE:

- Robust shredder assembly with solid cutter shafts
- Individual direct drive planetary gearboxes
- Remote curbside control with engine / PTO and shredder start / stop
- Alpine ShurGrip cart lift system
- Shred Load Detection fuel saver
- Full vision system including safety backup camera
- OSHA compliant integrated operator safety system
- Low travel height and low center of gravity
- 10% lower body for improved aerodynamics and better fuel efficiency
- Heavy duty body construction
- Galvanized steel deck
- Keith Walking Floor offload system

Optional Built in Hard Drive Shredder (available in most models)

STAK SERIES

The best value in fully featured shred trucks, the **STAK SERIES** is engineered and built tough to outlast all competition. If you want proven reliability, less maintenance, massive throughput and payload - look no further.

- Available in 2 models: STAK 26 & STAK 33
- Alpine solid shaft shredder
- Premium, low profile aerodynamic body
- Safety strobe lights & backup camera
- Shred Load Detection fuel saver
- Galvanized Steel Deck
- Keyed curbside control panel ignition
- Keith Walking Floor offload system
- Fully featured premium chassis
- **STAK 26** – NON CDL shreds up to 6,000 lbs/hr* with up to 8,250 lbs payload
- **STAK 33** – CDL shreds up to 7,500 lbs/hr* with up to 12,750 lbs payload

V-MAX

Looking for maximum power in a full sized truck? The **V-MAX** shreds up to **12,000 LBS** per hour and leaves all other trucks in this class in the dust. This is the fastest full sized shred truck on the market today.

- Alpine solid shaft shredder
- Premium, low profile aerodynamic body
- Safety strobe lights & backup camera
- Shred Load Detection fuel saver
- Galvanized Steel Deck
- Keyed curbside control panel ignition
- Keith Walking Floor offload system
- Fully featured premium chassis
- CDL shreds at an incredible **12,000 lbs/hr*** with up to 12,500 lbs payload

"Alpine Shredders has over a combined century of vehicle building experience. Our innovation, engineering and technology is built in to every shred truck we make."
